PHARMACY

study program

A pharmacist is, above all, an accomplished professional who always shows empathy, dedication and passion!

There is no field of medicine that can function without medications. What exactly are drugs? What are its composed of? How are drugs prepared and distributed? How do its function? By choosing the profession of a **PHARMACIST** at Nicolae Testemitanu State University of Medicine and Pharmacy of the Republic of Moldova, you will discover the answers to these inquiries and many more.

The pharmaceutical specialty encompasses everything related to the acquisition, processing, preparation, storage, dispensing, and control of medications. The pharmacist plays a pivotal role in these endeavors and holds significant responsibilities. It is crucial to recognize that a pharmacist should never be regarded as a **mere merchant**, but as a **highly skilled specialist**.

The **training period** for pharmacists at Nicolae Testemitanu University is **5 years**, and the curriculum is tailored to meet international standards, aiming to ensure the recognition of the pharmacist diploma in Europe and worldwide.

The **Pharmacy** study program is accredited by:

-  *The National Agency for Quality Assurance in Education and Research (2018);*
-  *World Federation for Medical Education (2022).*

After each year of study, academic internships are scheduled, and in the fifth year, there is an undergraduate practice in several pharmaceutical units, lasting for six months.

Graduates of the **Pharmacy** integrated higher education program obtain the title of Bachelor of Pharmacy, granting them the opportunity to pursue careers in various sectors of the pharmaceutical system.
