

NICOLAE TESTEMITANU STATE UNIVERSITY OF MEDICINE  
AND PHARMACY OF THE REPUBLIC OF MOLDOVA

The  
Medicine program  
offers instruction in four  
languages: **Romanian, Russian,  
English, and French**, reflecting the  
multinational and multicultural charac-  
ter of the University,  
with a particular focus on European Union  
countries. The **6-year** course of study  
culminates with a graduation exam, leading  
to the attainment of the **doctor's** diploma.

After graduation, individuals have the oppor-  
tunity to further their professional development  
through the following avenues:

- Master's and PhD study programs;
- Residency program in one of the following  
specialties:
  - Surgery;
  - Internal Medicine;
  - Pediatrics, etc.
- Continuing medical education programs.

Young specialists have the opportunity to work  
as doctors in various public and private medical  
institutions, both domestically and internationally.  
**At Nicolae Testemitanu University of the Republic  
of Moldova, we can help turn your dream of  
studying a noble profession into a reality! Join us  
in making a difference and contributing to the  
preservation of life on earth.**

# MEDICINE

study program

## MEDICINE IS AN ART, AND YOU CAN SHAPE ITS BEAUTY!

In its 80 years of existence, the Faculty of Medicine at *Nicolae Testemitanu* State University of Medicine and Pharmacy of the Republic of Moldova (the first faculty opened in 1945) has distinguished itself through tradition and innovation. It has demonstrated exceptional quality and excellence in training medical specialists who are competitive both within the national health system and internationally.

The study process is facilitated by approximately 500 scientific and teaching staff, most of whom hold prestigious academic titles such as Doctor and Habilitated Doctor in medical sciences.

The **Medicine** study program has a mission to train highly qualified medical professionals for the national and other countries health systems. The program emphasizes student-centered education, encouraging the active involvement of young individuals in scientific research to meet contemporary requirements and innovations in the field. Additionally, it focuses on fostering professional orientation, effective doctor-patient communication, and teamwork skills.

The *Medicine* Program of *Nicolae Testemitanu* University is highly valued and recognized both nationally and internationally. It holds accreditation from the following prestigious institutions:

-  *The National Agency for Quality Assurance in Education and Research (2018);*
-  *The World Federation for Medical Education (2022).*

The duration of the medical training program at *Nicolae Testemitanu* University is **6 years**, with the same curriculum applied to both local and international students. The training process is comprehensive, utilizing modern teaching, learning, and assessment methods in classes, seminars, laboratory work, as well as individual and teamwork activities.

### Stages of studies in Medicine Program:

- The training of first to third-year students takes place at the University's departments, where they have the opportunity to apply experimental medicine and utilize virtual study techniques with the aid of modern equipment.
- An especially captivating aspect is the anatomy classes held at the Museum of Human Anatomy, which showcases over 2,500 anatomical items. Practical lessons for third to sixth-year students are conducted at 95 university clinical bases in the city of Chisinau, encompassing both republican and municipal level hospitals, specialized healthcare facilities, scientific and research institutions.
- The University Center for Simulation in Medical Training plays a significant role in the education of future specialists. It provides a platform for students to enhance their communication skills with patients and refine their practical abilities through the utilization of high-fidelity simulators.
